

42D

42B

1. Glue pieces 42E to themselves as shown. Glue the light assembly to the inside of the alcove assembly—the correct position is marked with a white "X".
2. Glue the alcove assembly to piece 8L. When the time comes for you to glue the upper castle assembly to the roof assembly (page 37 in the original model instructions), glue the bottom of the alcove assembly to the roof as well.
